

Which holds more?

1. Estimating

	Object 1	Object 2	Object 3	Object 4	Object 5
Estimated capacity in mL					

Can you order your objects from the smaller to the largest capacity?

\_\_\_\_\_ < \_\_\_\_\_ < \_\_\_\_\_ < \_\_\_\_\_ < \_\_\_\_\_

2. Measuring

Now check your estimate by filling up each object with water. Use a measuring jug to measure the amount it can hold.

	Object 1	Object 2	Object 3	Object 4	Object 5
Measured capacity in mL					

3. Analysing

Was your estimate accurate? If not, can you explain why you thought it would hold more, or less liquid?
